

Conor Callaghan

Co. Galway, Ireland | (+353) 852761235 | conorcallaghan1763@gmail.com

PROFESSIONAL SUMMARY

GIS-focused professional with applied experience in spatial analysis, multi-criteria suitability modelling, and environmental constraint mapping. Proficient in QGIS, ArcGIS Pro, and remote sensing workflows, with strong data management and geospatial problem-solving skills developed through offshore wind and coastal planning projects.

EDUCATION

University College Cork | Co. Cork, Ireland

Sep 2024 – Sep 2025

Masters in Applied Coastal and Marine Management

University of Galway | Co. Galway, Ireland

Sep 2020 – May 2023

Bachelor of Arts Joint Honours – Geography and History

SKILLS

Technical: QGIS, ArcGIS Pro, ArcGIS Online, Google Earth Engine, ENVI, R (sf, raster, KDE modelling), multi-criteria decision analysis, geodatabase management (GeoJSON, KML, Shapefiles & GeoTIFF), Sentinel-2 processing, supervised classification, multi-temporal change detection.

Core Competencies: Erosion assessment, Flood risk analysis, Sediment dynamics, Coastal infrastructure, Risk evaluation, MSP frameworks, ICZM application, Policy constraint analysis, Environmental impact assessment, Resource management and rural development policy.

UNIVERSITY PROJECTS

Masters Thesis

- A GIS-based spatial optimisation study to balance offshore wind energy development with seabird conservation objectives. Integrated environmental, technical, and ecological datasets using QGIS and performed seabird movement modelling in R through Kernel Density Estimation to inform conflict-sensitive turbine placement.

GIS Applications

- Produced a national-scale GIS suitability assessment to identify candidate Marine National Park sites in Ireland, applying multi-criteria analysis, spatial overlay, buffering, and exclusion constraints across environmental, ecological, and policy datasets.
- Conducted a GIS-based soil pollution study in Galway City using QGIS, applying spatial joins, buffering, and hotspot mapping to analyse heavy-metal contamination hotspots.

Remote Sensing & Digital Image Processing

- A combined ENVI/GIS coastal erosion analysis for Dublin Bay using multi-temporal Sentinel-2 imagery, employing shoreline extraction, raster analysis, and change detection to quantify decadal shoreline change.
- Wildfire impact assessment for the Cloosh Valley using Google Earth Engine, applying NDVI/NBR indices, image differencing, and change detection to identify burn extent and vegetation loss.

Work Experience

Bartender

Garavans Bar - Galway City - Apr 2026 - Present

Bartender/Waiter

Peppers Bar and Restaurant - Co. Clare - June 2025 - Apr 2026
